

# BOSTON ACOUSTICS RECEPTER™ RADIO

*The Boston Acoustics Recepter Radio is a high-performance AM/FM radio that has been designed to deliver sound comparable to the finest radios ever made. It is a product of 20-plus years of audio engineering experience and our commitment to two philosophies: The Boston Sound™ and Boston Everywhere™.*

HIGH-FIDELITY  
AM/FM RADIO  
FOR HOME AND  
OFFICE USE

**Boston**  
Boston Acoustics

The new Receptor Radio has tuner performance found only in the most advanced component receivers costing many times its price. Its ability to pull in weak FM stations separates it from conventional radios, and its high selectivity allows it to separate closely spaced stations clearly.

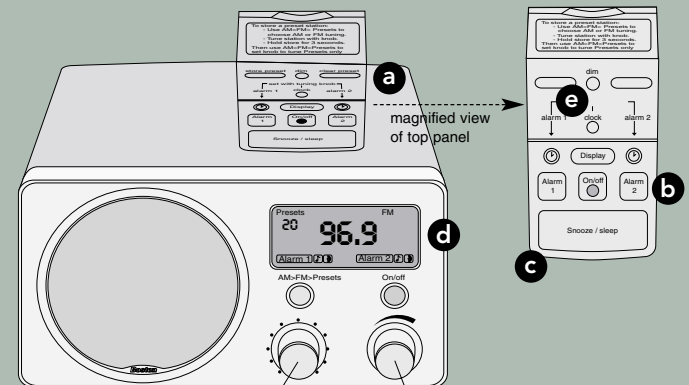

The Boston Acoustics Receptor Radio's surprising performance is made possible by Boston Acoustics' years of experience in designing and manufacturing high-performance audio equipment. The key to the Radio's sound is its Boston-designed wide-range driver. Optimized specifically for the Radio, it's combined with an actively-equalized amplifier that uses proprietary Boston BassTrac® circuitry for full, satisfying bass even at low volume. The result is a unit that delivers smooth, natural response and room-filling sound that belies its small size. This outstanding audio performance is coupled with a highly sensitive AM/FM tuner with a 20 preset-station memory for clear, distortion-free reception.

The Radio also has two independent wake-up alarms. Either alarm can be set to music, buzzer, or both. A large, easy-to-read LCD display clearly presents the station, clock, and alarm/sleep status, while a built-in sleep function lets the Radio play for up to 60 minutes before turning off automatically.

The Radio is easy to use and set: Times and stations can be quickly selected by turning a knob rather than repeatedly pressing buttons. And once you have stored your favorite stations in memory, the tuning knob can be set to tune in only those stations.

## GENERAL FEATURES

- a** Radio Preset Buttons are Protected Under a Recessed Panel to Avoid Accidental Reset
- b** Dual Independent Clock Alarms can be Set to Music, Buzzer, or Both
- c** Built-In Snooze and Sleep Functions
- d** Easy-to-Read LCD Displays Time, Station, Alarm(s), Band, and Presets
- e** Two-Position Brightness Control to Adjust for Day or Night

Dimensions 4x7 1/2 x6"  
(HxWxD)  
Weight 4 lbs. (1.8 kg)

## BOSTON ACOUSTICS RECEPTER™ RADIO

The Boston Acoustics Receptor Radio is a product of 20-plus years of audio engineering experience and our commitment to two philosophies:

### THE BOSTON SOUND™

What exactly is the Boston Sound? Simply, this means that all Boston systems—from our largest and most powerful home theater speakers to the Boston Acoustics Receptor Radio—all speak in the same "voice." What sets the Boston Sound apart is a pure, natural tonal balance from one end of the sonic spectrum to the other. Another way of saying this is that highs, mids, and lows all play in perfect balance. The result: a rich, vibrant sound that lets you hear exactly what the original artist had intended.

### BOSTON EVERYWHERE™

(A statement well-suited for the Boston Acoustics Receptor Radio.) If a tonally balanced, uncolored, and realistic sound is the "right" sound, it stands to reason that Boston systems are also "right" for all environments. And happily, we offer systems that work in any part of your house. In walls and ceilings. In bathrooms. Family rooms. Home theaters and more. We even make weather-resistant speakers that you can put on your boat or patio. And high-performance car speakers and amplifiers to take the Boston Sound on the road. The Boston Acoustics Receptor Radio typifies the Boston Everywhere belief. Enriching audio should not be limited to stereo or theater systems. Nor should it be limited to one room. Available in three attractive finishes, the Boston Acoustics Receptor Radio can be used in the kitchen, bedroom, family room, bathroom, office—anywhere.
