

play anywhere. play smart.

SoundWare

High Performance Indoor / Outdoor Speaker
For great sound anywhere

SoundWare is compact, high performance audio that redefines the word versatile. With a unique polyhedron shape they didn't teach you in geometry class, and highly-articulated mounting brackets, SoundWare is designed to fit anywhere music needs to be.

Sits or mounts at any angle

Simply rest them on any convenient horizontal surface, or use the articulating mounting brackets and aim them toward the center of your room, the edge of your pool, or wherever your ears are likely to find themselves.

pivoting mounting bracket included

hardware for flush and corner mounting

Indoors or outdoors

Made of weather-resistant materials, SoundWare is built to withstand scattered showers, tropical depressions. Pretty much everything Mother Nature is likely to throw at them.

Specifications:
